Debrief

Run by

Dr Instructor, two residents

Scenario	Anaphylaxis under anaesthesia
Patient	F 50 y 70 kg
Started	10/11/2026, 4:53:10 PM
Duration	01:27 simulated · 41 s on the clock

Objectives

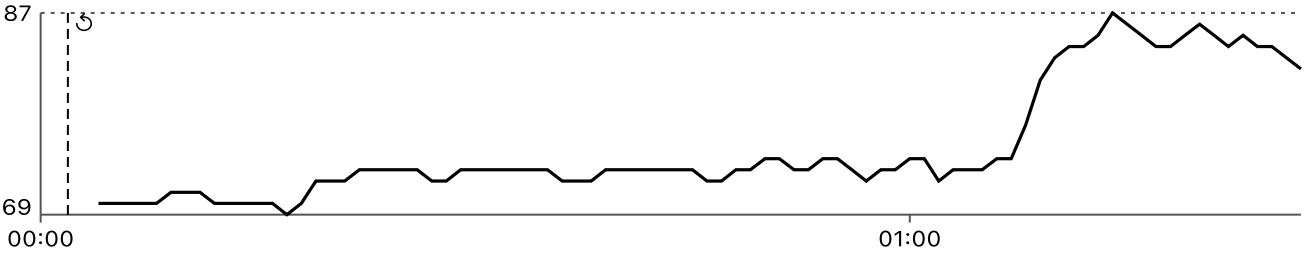

1. **– Not assessable** Recognise anaphylaxis: hypotension, tachycardia, bronchospasm
   This objective has no rule: the instructor judges it.
2. **✓ Met** Give epinephrine 50–100 µg IV early and repeat as needed (debrief: within 2 min of the reaction — draft, owner to confirm)
   Epinephrine 2 s after the state "Anaphylaxis" (01:00 → 01:02; within 2 min 00 s asked).
3. **✕ Not met** Give fluid for the capillary leak
   Fluid: did not happen
